WE CLAIM:

- A method of treating a disease state characterized by alterations to the
 mucin levels in a patient, the method comprising enterally administering to the patient
 a nutritional composition which has a protein source including amino acids wherein
 threonine comprises at least 5.5% by weight of the amino acids.
- The method of claim 1 wherein threonine comprises at least 6% by weight of the amino acids.

10

- The method of claim 1 wherein the protein source comprises sweet whey protein.
 - 4. The method of claim 3 wherein the sweet whey protein is hydrolyzed.

- The method of claim 1 wherein the nutritional composition further comprises a lipid source and a carbohydrate source.
- The method of claim 5 wherein the lipid source comprises a mixture of
 medium chain triglycerides and long chain triglycerides.
 - 7. The method of claim 6 wherein the lipid source comprises about 30% to about 80% by weight of medium chain triglycerides.
- 25 8. A method for maintaining the synthesis of mucins in a patient, the method comprising enterally administering to the patient a nutritional composition which has a protein source including amino acids wherein threonine comprises at least 5.5% by weight of the amino acids.
- The method of claim 8 wherein the protein source comprises sweet whey protein.

- 10. The method of claim 9 wherein the sweet whey protein is hydrolyzed.
- The method of claim 8 wherein the nutritional composition further
 comprises a lipid source and a carbohydrate source.
 - 12. The method of claim 11 wherein the lipid source comprises a mixture of medium chain triglycerides and long chain triglycerides.
- 10 13. The method of claim 12 wherein the lipid source comprises about 30% to about 80% by weight of medium chain triglycerides.
 - 14. A method for maintaining the synthesis of mucins in a patient, the method comprising enterally administering to the patient a nutritional composition which includes a protein source containing a therapeutically effective amount of threonine, a carbohydrate source and a lipid source including a mixture of medium chain triglycerides and long chain triglycerides.
- The method of claim 14 wherein the amount of threonine comprises at
 least 5.5% by weight of amino acids of the protein source.
 - 16. The method of claim 14 wherein the protein source comprises sweet whey protein.
- 25 The method of claim 14 wherein the sweet whey protein is hydrolyzed.
 - 18. The method of claim 14 wherein the lipid source comprises about 30% to about 80% by weight of medium chain triglycerides.
- 30 19. The method of claim 14 wherein the protein source provides about 10% to about 20% of the energy of the nutritional composition.

15

- 20. A method of treating a disease state characterized by alterations to the mucin levels in a patient, the method comprising enterally administering to the patient a nutritional composition that has a protein source including amino acids wherein threonine comprises at least 7.4% by weight of the amino acids.
- 21. The method of claim 20 wherein threonine comprises at least 14% by weight of the amino acids.
- 10 22. The method of claim 20 wherein the protein source comprises a sweet whey protein.
 - The method of claim 20 wherein the protein source comprises a caseinoglyco-macropeptide.
 - 24. A method for maintaining the synthesis of mucins in a patient, the method comprising enterally administering to the patient a nutritional composition which has a protein source including amino acids wherein threonine comprises at least 7.4% by weight of the acids.
 - The method of claim 24 wherein threonine comprises at least 14% by weight of the amino acids.
- 26. The method of claim 24 wherein the protein source comprises a sweet25 whey protein.
 - The method of claim 24 wherein the protein source comprises caseinoglyco-macropeptide.

- 28. A method for increasing the synthesis of mucins, the method comprising supplementing a diet of a patient by adding a therapeutically effective amount of threonine to the diet
- 5 29. The method of claim 28 wherein the amount of threonine is at least 0.2mM.
 - 30. The method of claim 28 wherein the amount of threonine is at least 0.8mM
 - The method of claim 22 wherein the amount of threonine ranges from about 0.2mM to about 0.8mM.
- 32. A method for increasing the synthesis of mucins in a patient, the method comprising administering to the patient a nutritional composition which has a protein source containing theronine at least 30% of a daily recommended amount of threonine.
 - 33. The method of claim 32 wherein the amount of threonine comprises at least 60% of the daily recommended amount of threonine.
 - 34. The method of claim 32 wherein the amount of threonine comprises at least 100% of the daily recommended amount of threonine.
- 35. A method of treating intestinal inflammation in a patient, the method
 comprising administering to the patient a therapeutically effective amount of threonine.
 - 36. The method of claim 35 wherein the threonine is provided as a nutritional supplement.
- 30 37. The method of claim 36 wherein the nutritional supplement contains threonine in an amount of at least 0.2mM

15

- 38. The method of claim 36 wherein the nutritional supplement contains a protein source including amino acids and wherein the threonine is at least 5.5% by weight of amino acids.
- The method of claim 36 wherein the nutritional supplement contains a sweet whey protein.
- 40. A method of treating intestinal bacterial infection in a patient, the method comprising administering a nutritional composition to the patient wherein the nutritional composition contains a therapeutically effective amount of threonine.
 - 41. The method of claim 40 wherein the threonine is provided as a nutritional supplement.
 - 42. The method of claim 41 wherein the nutritional supplement contains threonine in an amount of at least 0.2 mM.
- 43. The method of claim 41 wherein the nutritional supplement contains a 20 protein source including amino acids and wherein the threonine is at least 5.5% by weight of amino acids.
 - 44. The method of claim 41 wherein the nutritional supplement contains a sweet whey protein.
 - 45. A method of reducing oxidative stress due to acute intestinal inflammation, the method comprising administering a therapeutically effective amount of threonine.
- 30 46. The method of claim 45 wherein the threonine is part of a nutritional composition.

- 47. The method of claim 46 wherein the nutritional composition contains threonine in an amount of at least 0.2mM.
- 5 48. The method of claim 46 wherein the nutritional composition contains a protein source including amino acids and wherein the threonine is at least 5.5% by weight of amino acids.
- $\begin{tabular}{ll} 49. & The method of claim 48 wherein the nutritional composition contains a \\ 10 & sweet whey protein. \end{tabular}$
